**Leroy:**

**These are the activities that we discussed to do during this week. Please keep me updated on progress. I will continue to work with Beth on the other Frac Tanks and ASTs while on phone duty so we hopefully don't have a slow down.**

**I need Beth to help us decide on sampling protocol on the Dana tanks so we collect the information we need to determine the appropriate disposal options. I would like to have Daniel take those samples next week and get them in since it is taking Accutest at least 14 days to get us a 7 day turnaround time.**

**Also, Daniel will be taking additional samples on 11/7/14 out of FT1004 (2-32 oz) and FT506 (2-32oz) as the Houston lab needed additional volume. They will be running TCLP on the samples.**

**Thanks**
